SECTION 01

INTRODUCTION

Purpose & Scope of This Document

01

Purpose of This Document

These brand guidelines define the complete visual and strategic identity of Koleex International Group. The purpose of this document is to ensure absolute consistency across all brand applications — including products, software, packaging, websites, social media, exhibitions, documents, and environments.

> **Important:** This document is the single source of truth for the Koleex brand identity. All design work, marketing materials, and communications must reference and follow these guidelines.

Who Should Use This Document

- Graphic designers and visual designers
- UI/UX designers and product designers
- Software engineers and web developers
- Marketing and communications teams
- Packaging and product designers
- Exhibition and interior designers
- External partners, agencies, and suppliers
- Manufacturing and engineering teams

What This Document Covers

The Koleex brand identity is a complete system — not just a logo or color palette. This document covers the full identity system including typography, layout, grid systems, icon design, UI design, packaging, posters, motion design, exhibition environments, and all digital interfaces.

Consistency is the foundation of a strong global brand. Every material produced under the Koleex name must follow these guidelines strictly to maintain a unified and recognizable brand image.

KOLEEX

SECTION 02

BRAND OVERVIEW

What Koleex Is and What It Represents

02

Koleex International Group is a global industrial and technology organization operating across manufacturing, software, automation, trade, and future technologies — all under one unified brand system.

6+	Global	1 System	Future
Core Sectors	Operations	Unified Brand	Technology Focus

About Koleex International Group

Koleex combines industrial engineering, software systems, automation technologies, and modern design to create machines, systems, and solutions for modern industries and future technologies. The group focuses on building technology-driven businesses, industrial systems, and software platforms while expanding globally across different industries and markets.

Brand Positioning

Global Industrial & Technology Group

Koleex is positioned as a global industrial and technology group that develops machines, systems, software, automation solutions, and industrial technologies. The brand must always appear professional, structured, minimal, technological, and globally positioned.

Sectors of Operation

◆ **Manufacturing** Industrial machines, equipment, and production systems	◆ **Technology** Software platforms, digital systems, and tech solutions	◆ **Automation** Smart manufacturing, control systems, and industrial automation
◆ **International Trade** Global trade, import/export, and distribution networks	◆ **Systems** Enterprise systems, IoT platforms, and industrial software	◆ **Future Technologies** AI systems, smart factory, and next-generation industrial tech

Note: Koleex is not limited to one industry. The brand operates across multiple industries and technologies under one unified brand system.

KOLEEX

SECTION 03

KOLEEX INTERNATIONAL GROUP

Group Structure & Brand Architecture

03

Koleex International Group is the parent organization operating across industrial manufacturing, technology development, software systems, automation, international trade, and future technology projects — all under a single unified brand identity.

Group Overview

The group structure allows Koleex to operate across different industries while maintaining a unified brand identity. Every division, product, and software platform operates under the single Koleex master brand.

Brand Architecture Model

Koleex follows a **Unified Brand Architecture** — all products, software platforms, divisions, and services operate under the single Koleex master brand to build maximum global brand recognition.

KOLEEX INTERNATIONAL GROUP	
Manufacturing Division Machines, equipment, production systems	**Technology Division** Software, platforms, digital products
Automation Division Smart systems, control, industrial automation	**Trade Division** Import/export, global distribution networks

All companies, products, software systems, and divisions operating under the Koleex name must follow the Koleex brand guidelines, design system, and visual language to maintain a consistent global brand identity.

KOLEEX

SECTION 04

BRAND MEANING

The Philosophy Behind the Name KOLEEX

04

The name KOLEEX is not random — each letter represents a core principle that defines the company's approach to industry, technology, and systems.

Meaning of the Name KOLEEX

K · O · L · E · E · X

K
KNOWLEDGE
Understanding, expertise, experience, research, and technology development

O
OPERATIONS
Industrial operations, manufacturing, systems management, and automation processes

L
LOGIC
Engineering logic, structured thinking, software systems, and intelligent automation

E
EVOLUTION
Continuous development, technology advancement, and future industrial innovation

E
EXCELLENCE
Quality, precision, performance, engineering standards, and attention to detail

X
EXECUTION
Implementation, manufacturing, production — turning ideas into real systems and products

> *"KOLEEX represents a company built on knowledge, driven by operations, structured by logic, evolving through technology, committed to excellence, and defined by execution."*

KOLEEX

SECTION 05

BRAND PHILOSOPHY

Core Beliefs & Company Thinking

05

The Koleex brand is built on the philosophy of combining industry, technology, systems, and design into one unified ecosystem — where the future of industry is machines, software, automation, and intelligent technologies working together.

The Koleex Philosophy

> *"The future of industry is not only machines — it is systems, software, automation, and intelligent technologies working together as one ecosystem."*

Core Philosophy Principles

01 **Industry must evolve through technology**	02 **Software will become as important as hardware**	03 **Systems thinking is more important than individual products**
04 **Design is structure and function — not decoration**	05 **Simplicity is more powerful than complexity**	06 **Precision and details define quality**
07 **Consistency builds strong global brands**	08 **Technology and engineering must work together**	09 **The company must think and operate globally**
10 **Every product, system, and software must follow the same design language**	11 **The brand must be consistent across every single touchpoint**	

KOLEEX

SECTION 06

DESIGN PHILOSOPHY

Visual Language & Design Principles

06

The Koleex design philosophy is based on minimalism, structure, precision, and technology-driven design — creating a visual identity that feels like a global engineering and technology group.

The Koleex Design Language

Minimal	Structured	B&W; First	Precise
No Decoration	Grid Based	Primary Palette	Every Detail Counts

Design Principles

01 **Minimal design — no unnecessary decoration**	02 **Clean layouts with strong grid systems**	03 **Large negative space — white space is intentional design**
04 **Black and white as primary color system**	05 **Limited color usage — only when functionally necessary**	06 **Thin lines and geometric graphic elements**
07 **Clean typography with consistent hierarchy**	08 **Functional design — every element serves a purpose**	09 **Technology and industrial visual language**
10 **Professional and global brand image — premium, not luxury**	11 **Consistency across all platforms without exception**	

Design References

The Koleex design aesthetic is inspired by global technology leaders:

Apple Clean interfaces, minimal design, generous negative space, premium feel	**Tesla** Industrial technology meets modern design, dark UI, precision engineering
Sony Global electronics brand, structured minimal design, consistent system	**Industrial Software** Dashboard-driven, data-heavy, structured engineering-grade interfaces

Design Scope — 12 Applications

The Koleex design system must be consistent across all the following:

Products & Machines Industrial hardware and machine design	**Software & Dashboards** UI/UX, web apps, control panels	**Websites & Landing Pages** All digital web touchpoints
Posters & Print Marketing and communication materials	**Packaging & Labels** Product boxes, stickers, labels	**Exhibition Booths** Spatial brand experience
Office Interiors Branded workspace environments	**Documents & Reports** Corporate documentation	**Social Media** All digital social channels
Applications & UI Mobile and web applications	**Videos & Motion** Animation, video content	**Presentations** Corporate slide decks

KOLEEX

SECTION 07

BRAND PERSONALITY

Character, Voice & Brand Character Profile

07

The Koleex brand personality represents a global, professional, and technology-driven organization that communicates with confidence, clarity, and precision.

The Koleex Character

> *"If Koleex were a person, it would be calm, confident, intelligent, and precise. It speaks less, but speaks with certainty. It does not need to shout."*

GLOBAL	PROFESSIONAL	MINIMAL	TECHNOLOGICAL	INDUSTRIAL	INNOVATIVE	CONFIDENT	FUTURE-FOCUSED

Personality Traits — IS vs. IS NOT

KOLEEX IS	KOLEEX IS NOT
✓ Global — operates and thinks internationally	✗ Playful or cartoonish
✓ Professional — always precise and structured	✗ Colorful or excessively decorated
✓ Minimal — simple, no excess	✗ Luxury fashion or lifestyle brand
✓ Technological — digitally-driven and systems-oriented	✗ Cheap, messy, or inconsistent
✓ Industrial — built for manufacturing and engineering	✗ Overly complex or futuristic with too many effects
✓ Innovative — always developing and evolving	✗ Loud, flashy, or attention-seeking
✓ Confident — quiet authority, no need to shout	✗ Emotional marketing language
✓ Intelligent — structured thinking, data-driven	✗ Random or unstructured communication
✓ Future-focused — always building toward tomorrow	
✓ Detail-oriented — precision in every element	

Global — Professional — Future — Minimal — Industrial — Technology — Innovation

SECTION 08

TONE OF VOICE

How Koleex Communicates

The Koleex tone of voice must always be professional, clear, confident, and structured. The brand voice sounds like an engineering and technology company — not a marketing company.

Communication Style

Professional	**Confident**	**Structured**	**Technical**	**Clear**	**Logical**	**Global**

Tone Characteristics

Professional Precise, formal, credible	**Technical but clear** Informative without jargon overload	**Confident** Speaks with quiet authority
Structured Short, logical sentences	**Logical** Data-driven, evidence-based	**Global tone** No slang, no jokes, no emotional language

Tone in Practice

✗ **AVOID:**	*"Our amazing machine will change your life and is the best machine ever made."*
✓ **USE:**	*""Designed for precision, performance, and industrial automation.""*
✓ **USE:**	*""Built for modern industrial systems and automation environments.""*
✓ **USE:**	*""Engineered for performance, reliability, and system integration.""*
✓ **USE:**	*""Systems. Performance. Evolution.""*

KOLEEX

SECTION 09

BRAND LANGUAGE SYSTEM

Words, Terms & Brand Vocabulary

09

Koleex uses a structured vocabulary built around technology, systems, engineering, and future development. These words reflect the brand's identity and must be used consistently.

Approved Brand Vocabulary

Systems	**Technology**	**Engineering**	**Automation**
Smart Systems	**Industrial Solutions**	**Performance**	**Precision**
Evolution	**Innovation**	**Infrastructure**	**Platform**
Integration	**Global**	**Industrial Technology**	**Future Systems**
Intelligent Systems	**Digital Systems**	**Industrial Automation**	**Engineering Solutions**
Production Systems	**Software Systems**	**Control Systems**	**Smart Factory**
Technology Platform	**System Architecture**		

Brand Language Examples

Industrial Technology Systems	*Smart Industrial Solutions*
Engineering Automation Systems	*Intelligent Production Systems*
Industrial Software Platforms	*Future Industrial Technologies*
Global Industrial Systems	*Automation and Control Systems*
Integrated Industrial Platforms	*Engineering Driven Technology*

KOLEEX

SECTION 10

BRAND SLOGAN

Main Corporate Slogan & Secondary Lines

10

The Koleex slogan system establishes the brand's verbal identity across all corporate communications, marketing materials, and brand touchpoints.

Main Brand Slogan

KOLEEX — Shaping the Future

Usage: This is the main corporate slogan. Use in corporate communication, presentations, exhibitions, company profile, website header, and all primary brand materials.

Secondary Brand Lines

These lines can be used in posters, presentations, product pages, videos, and marketing materials:

"From Knowledge to Execution"	*"Engineering the Evolution of Industry"*
"Logic. Evolution. Execution."	*"Designing the Future of Industry"*
"Industrial Technology, Evolved"	*"Systems. Machines. Evolution."*
"Building Intelligent Systems"	*"Technology Driven. Future Focused."*
"Industrial Thinking. Global Vision."	*"Creating Future Systems"*

KOLEEX

SECTION 11

BRAND WRITING RULES

Correct Brand Name Usage

11

The brand name must be written consistently across all materials. Incorrect capitalization or spacing weakens brand recognition and global brand image.

Brand Name Writing Rules

✓ **Koleex**	✗ **koleex** (all lowercase — not allowed)
✓ **Koleex International Group**	✗ **Koleex international group**
✓ **KOLEEX**	✗ **KOLEEX International group**
✓ **KOLEEX INTERNATIONAL GROUP**	✗ **Koleex INTERNATIONAL GROUP**

Golden Rule: Consistency in brand name writing is critical for brand identity. Always double-check before publishing any material.

KOLEEX

SECTION 12

LOGO SYSTEM

Logo Versions, Placement & Usage Rules

12

The Koleex logo is the primary visual identifier of the brand. It must always appear clean, minimal, and well-spaced — never crowded, stretched, distorted, or placed randomly.

Logo Overview

5	B&W; Only	1× K Height	80px / 28mm
Logo Versions	Color Rule	Min Clear Space	Min Size

Approved Logo Versions

KOLEEX	KOLEEX	KOLEEX	K	KOLEEX
Primary Logo White on Black	Secondary Logo Black on White	Monochrome Gray Subtle / Watermarks	Symbol Only App Icon / Favicon	Full Name Formal Corporate Use

Color Rule: Only black and white logo versions are permitted. No other colors are allowed for the logo under any circumstances.

Clear Space Rule

Always maintain a clear protected zone around the logo on all four sides. This space ensures the logo is always readable and never appears crowded.

Minimum Clear Space = Height of the letter "K" in the logo on all 4 sides

- Do not place text within the clear space zone
- Do not place images touching the logo
- Do not place frames or borders too close to the logo

• The clear space rule applies in all four directions — top, bottom, left, right

Minimum Logo Size

Size	Minimum Dimensions	Context
Medium	80px / 28mm minimum width	Standard use on most materials
Small	40px / 14mm minimum width	Labels, small printed materials
Micro	20px / 7mm minimum width	Extreme minimum — use with caution

Logo Placement Rules

Position	Usage
1. Top Left	Most recommended — standard position for all materials
2. Top Center	Announcement posts, centered layouts, event materials
3. Center	Cover pages, splash screens, loading screens
4. Bottom Left	Image-dominant designs when logo is secondary
5. Back side / Bottom	Small watermark or secondary placement

Never: Random position · Too close to edge · Overlapping other elements · Inside random shapes

Logo on Light vs. Dark Backgrounds

Background Type	Logo Version	Examples
Light Background (White / Light Gray)	Black Logo	Documents, letterhead, invoices, manuals, light packaging
Dark Background (Black / Dark Gray)	White Logo	Posters, dark UI, exhibition booth, video, dark packaging
Colored / Image Background	Check contrast — use overlay if needed	Always ensure logo is readable

Logo Placement by Application

Application	Position	Size Note
Poster	Top left or top center	Small — approx. 15% of width
Social Media Post	Top left (primary)	15–20% of post width
Packaging Front	Top center	Prominent but balanced

Application	Position	Size Note
Document / Report	Top left	Small
Presentation	Top left corner	Small
Website Header	Top left	Standard navigation size
Exhibition Booth	Back wall center / top	Large — dominant display
Vehicle	Both sides + rear	Large vinyl
UI — Dashboard	Top left of sidebar	Small
UI — Splash Screen	Center	Medium
UI — App Icon	Symbol K only	Square format

Logo on Images & Photos

• Always use white logo on dark/busy images
• Always use black logo on bright/light images
• Add a dark overlay if background image is too bright
• Add a light overlay if background image is too dark
• Do not place logo on a busy or high-detail area of the image
• Place logo in an empty / clean area of the image
• Maintain clear space even when placed over images
• Logo must always remain readable at a glance

Logo on UI / Software

Logo placement in UI applications:

• Splash screen → Center
• Login screen → Top center
• Dashboard → Top left
• Sidebar → Top
• About page → Center
• Loading screen → Center
• App icon → Symbol or K

Logo Watermark Rules

Used in:

• Posters

- Backgrounds
- Presentations
- Covers
- Videos
- Certificates
- Documents covers

Property	Rule
Opacity	5% – 10% only
Color	Gray or white only
Size	Large — spans background
Position	Behind all content
Rule	Never overlap readable text
Visibility	Subtle — not the focus

Incorrect Logo Usage — Never Do This

Do NOT:

- Stretch the logo
- Change logo color
- Add gradient to logo
- Add shadow to logo
- Add glow to logo
- Rotate the logo
- Add outline
- Change font
- Compress logo
- Add effects
- Place on busy background
- Place too close to edge
- Place inside shapes randomly
- Add text near logo
- Use low quality logo
- Change letter spacing
- Write KOLEEX with different font

Logo Do & Don't Summary

DO	DON'T
✓ Use black or white logo only	✗ Do not stretch
✓ Maintain clear space	✗ Do not change color
✓ Use correct placement	✗ Do not add effects
✓ Keep logo clean	✗ Do not rotate
✓ Use high contrast	✗ Do not place on busy background
✓ Use official logo files	✗ Do not place too small
✓ Follow minimum size	✗ Do not modify logo
✓ Keep logo readable	✗ Do not change spacing
✓ Use minimal layout	✗ Do not use unofficial logo
	✗ Do not put logo inside random shapes

KOLEEX

SECTION 13

TYPOGRAPHY SYSTEM

Typeface, Type Scale & Typographic Rules

13

Typography is a core pillar of the Koleex visual identity. Every font choice, size, weight, and spacing decision must follow these guidelines to maintain a unified, professional, and globally consistent brand voice.

Primary Typeface — Helvetica Neue

The official Koleex typeface is **Helvetica Neue** — one of the most iconic, clean, and globally trusted sans-serif typefaces in the world. It represents structure, precision, and engineering thinking — perfectly aligned with the Koleex brand identity.

> **Font Family:** Helvetica Neue | **Fallback (Digital):** Helvetica | **System Fallback:** Arial, sans-serif

Font Weight System

Font Style	Weight	Primary Usage
Helvetica Neue UltraLight	100	Decorative headlines, hero overlays (limited use)
Helvetica Neue Light	300	Large display text, hero subtitles
Helvetica Neue Regular	400	Body text, descriptions, captions, UI labels
Helvetica Neue Medium	500	Subheadings, card titles, button labels
Helvetica Neue Bold	700	Section headings, emphasis, key callouts
Helvetica Neue Black	900	Display text, major numbers, large stats

Type Scale — Digital (Screen / UI)

> **Rule:** Always use the defined type scale. Never use arbitrary font sizes. All sizes are based on a 4pt grid system for consistent vertical rhythm.

Style	Size	Weight	Use Case
Display / Hero	64 – 96 pt	Light or Black	Website hero, splash screen, large posters
H1 — Page Title	48 pt	Bold	Section headers, page titles, main headings
H2 — Section	32 pt	Bold	Section headings, dashboard blocks
H3 — Sub-Section	24 pt	Bold	Card titles, sidebar headers, sub-sections
H4 — Component	18 pt	Medium/Bold	Component headings, list item titles

Style	Size	Weight	Use Case
H5 — Label Head	14 pt	Bold	Form labels, table column headers, tags
Body Large	16 pt	Regular	Primary body copy, important descriptions
Body Regular	14 pt	Regular	Standard body text, UI copy
Body Small	12 pt	Regular	Supporting information, secondary text
Caption	10 pt	Regular	Image captions, footnotes, metadata
Label / Micro	8 – 9 pt	Bold	Badges, tags, status labels, timestamps

Type Scale — Print

Style	Size	Weight	Use Case
Cover / Poster Title	60 – 120 pt	Black or Bold	Book covers, poster headlines
H1 — Document Title	32 – 40 pt	Bold	Section dividers, chapter titles
H2 — Section Title	22 – 26 pt	Bold	Section headings in documents
H3 — Sub-Heading	16 – 18 pt	Bold	Subsection headings
Body Text	10 – 11 pt	Regular	Main body copy in documents
Footer / Page No.	8 pt	Regular	Page numbers, document footers
Caption / Note	7 – 8 pt	Regular	Image captions, footnotes

Line Height & Letter Spacing

Text Type	Line Height	Letter Spacing	Notes
Body Text	1.5× – 1.6× font size	0 – 0.02 em	Comfortable reading rhythm
Headlines (H1–H2)	1.1× – 1.2× font size	-0.02 – 0 em	Tight, strong headline feel
Sub-headings (H3–H5)	1.3× – 1.4× font size	0 – 0.01 em	Clear label hierarchy
Display / Hero	1.0× – 1.05× font size	-0.03 – -0.01 em	Ultra-tight premium look
Caption / Micro	1.4× – 1.5× font size	0.02 – 0.05 em	Legible at small sizes
ALL CAPS Labels	1.2× font size	0.1 – 0.15 em	Required for caps readability

Typography Color Rules

Type Role	Color Value	Usage Context
Primary Text	#000000 (Black)	Main headings, primary body, UI labels
Secondary Text	#333333 (Dark)	Supporting body text, secondary headings
Tertiary Text	#666666 (Gray)	Captions, metadata, disabled text
Muted Text	#999999 (Light Gray)	Placeholder text, hints, inactive states
Inverted Text	#FFFFFF (White)	Text on dark/black backgrounds only
Accent Text	#0066FF (Blue)	Links, CTAs, highlighted interactive elements

Typography Do & Don't

DO	DON'T
✓ Use only Helvetica Neue (or Helvetica/Arial fallback)	✗ Mix multiple typefaces in one design
✓ Follow the type scale exactly — no arbitrary sizes	✗ Use decorative or script fonts
✓ Use Bold weight for headings and emphasis	✗ Use italics as a primary text style
✓ Maintain consistent line height throughout	✗ Set body text below 10pt in print or 12pt on screen
✓ Use ALL CAPS only for labels, tags, and short titles	✗ Use random font sizes not in the type scale
✓ Left-align body text for readability	✗ Stretch or distort type
✓ Use proper letter-spacing for ALL CAPS text	✗ Use light gray text on white — maintain contrast

Typographic Hierarchy Example

Display	KOLEEX INTERNATIONAL GROUP
H1	Section Title Here
H2	Sub-Section Heading
H3	Component Heading
Body	This is body copy text. Readable, clean, professional.

Caption	Caption text — small supporting information

KOLEEX

SECTION 14

LAYOUT & GRID SYSTEM

Structure, Grids, Spacing & White Space

14

The Koleex layout system is built on structure, alignment, white space, and grid discipline. White space is not empty space — it is a critical, intentional design element.

Layout Design Philosophy

> *"White space is not wasted space. It is the foundation of premium, professional design. Every margin, every gap, every breath of space is intentional."*

Layout Principles

01 **Grid-based layout — always align to a column grid**	02 **Strong alignment — every element on the same baseline**	03 **Large white space — generous breathing room**
04 **Minimal elements — only what is necessary**	05 **Clear visual hierarchy — important content reads first**	06 **Structured composition — intentional placement**
07 **Balanced layout — visual weight distributed properly**	08 **Consistent margins — same value throughout a document**	09 **Logo always aligned to grid — never placed freely**

Standard Grid System

Application	Grid	Notes
Website / UI	12 Column Grid	Primary digital grid system
Posters	6 Column Grid	Print and large format materials
Social Media	4 Column Grid	Square and portrait post formats
Packaging	3 Column Grid	Box and label layout system
Documents / Reports	2 Column Grid	Reports, brochures, profiles
Minimal Posters	1 Column	Hero-focus, single statement designs

Spacing Scale — Base-8 System

> **Rule:** Koleex uses a strict base-8 spacing scale. All margins, padding, and gaps must be exact multiples of 8px (4px minimum). Never use arbitrary spacing values.

4px	XS		Micro gaps, icon internal padding
8px	S		Small component spacing, inner padding
16px	M		Standard spacing, button padding
24px	L		Section inner padding, card padding
32px	XL		Between components in a section
48px	2XL		Between major sections
64px	3XL		Large section separation
96px	4XL		Page section spacing, major breaks
128px	5XL		Hero padding, maximum spacing

Print Margins Standard

All Koleex print materials use consistent page margins:

Left Margin	Right Margin	Top Margin	Bottom Margin
25 mm	**25 mm**	**25 mm**	**25 mm**

White Space Rules

- Use large margins on all sides — never go to the edge
- Never fill the entire design with content
- Leave empty areas around key visual elements
- White space creates premium feeling — Apple style
- White space improves readability and comprehension
- Empty space is not wasted space — it is intentional design
- Logo must always have breathing room (clear space)
- Typography must have adequate line spacing

Website Layout Structure

#	Section	Description
1	Hero Section	Full width, large typography, key visual
2	Introduction	Brief company overview
3	Products / Solutions	Product showcase grid
4	Technology Section	Technology highlights

#	Section	Description
5	Systems / Software	Software platform overview
6	News / Blog	Latest updates
7	Partners	Partner logos grid
8	Footer	Navigation, contact, social

Alignment Rules

- Always align all elements to the active grid
- Never place elements randomly or "by eye"
- Left-align body text (preferred in most layouts)
- Center-align titles on covers and posters only
- Right-align page numbers and metadata
- All elements must share common baseline alignment
- Consistent left margin used across all pages of a document

Layout Do & Don't

DO	DON'T
✓ Use grid system on every design	✗ Random element placement
✓ Maintain consistent margins	✗ Crowded designs with no breathing room
✓ Use large white space generously	✗ Inconsistent margins across pages
✓ Align all elements to grid	✗ Too many competing elements
✓ Keep layouts minimal and structured	✗ Ignoring the grid system
✓ Use consistent spacing scale	✗ Different layouts for same content type

KOLEEX

SECTION 15

ICON SYSTEM

Icon Design, Sizes & Style Rules

15

Icon Design Philosophy

The Koleex icon system uses a minimal, geometric, outline-style design language. Icons must feel like engineering precision — similar to Apple SF Symbols, Tesla UI icons, or industrial dashboard icons.

Icon Design Principles

• Minimal and geometric — no decorative elements
• Outline style (line icons) — not filled by default
• Clean and technical in style
• Engineering / industrial software aesthetic
• No cartoon style icons
• No filled icons unless functionally necessary
• No complex icons — simple and recognizable
• No colorful icons — black, white, and gray only
• Consistent stroke weight across entire icon system
• Consistent grid alignment
• Consistent corner radius throughout

Standard Icon Sizes

Grid Size	Category	Usage
16 × 16 px	Micro	Table cells, status indicators, compact UI
24 × 24 px	Small	Standard UI icons, sidebar, navigation (primary size)
32 × 32 px	Medium	Dashboard cards, feature list items, buttons
48 × 48 px	Large	Feature icons, section headers, empty states
64 × 64 px	XL	Landing page features, large highlights
128 × 128 px	Display	App icons, illustrations, presentation use

Stroke & Corner Specifications

Property	Specification
Stroke Thickness	1.5px at 24px base size — scales proportionally with icon size
Corner Radius	2px at 24px — slight rounding gives modern feel
Grid Baseline	All icons must be designed inside a square grid (24×24 or 32×32)

Property	Specification
Optical Correction	Apply optical adjustment for circles and diagonal lines

Icon Color & State System

State	Color Value	Usage
Default	#000000 (light) / #FFFFFF (dark)	Normal active state
Secondary	#666666	Less important or supporting icons
Disabled	#CCCCCC	Inactive or unavailable state
Hover	#333333	Mouse over interaction
Active / Selected	#000000 with background	Currently selected state
Error	#FF3333	Error or warning indicator only
Success	#00CC66	Completion or success indicator only

Icon Categories — Full System

> **Note:** Koleex requires a complete custom icon library covering all four categories below. Every icon must follow the outline style, grid system, and stroke rules defined above.

System Icons

- Dashboard
- Settings
- User
- Lock

Shadow & Glow Effects

Effect Type	Opacity Rule	Blur & Offset	When to Use
Drop Shadow (Normal)	Opacity: 10–15%	Blur: 10–20px, Y-offset: 2–4px	Use on floating icon cards
Shadow (Dark UI)	Opacity: 20–25%	Blur: 12–24px, Y-offset: 3–6px	Dark surfaces only
Glow (Active State)	Blue Glow only	Opacity: 30–50%, Blur: 12–20px	Active / selected icons
Glow (Hover)	Blue Glow soft	Opacity: 15–25%, Blur: 8–14px	Hover state feedback
No Shadow	N/A	Standard flat icons	Default icon state

Glow Rule: Blue glow (#0066FF) is the ONLY allowed glow color. Glow must never be too strong — subtle and professional. No red, green, or random color glows. No neon effects.

Icon Animation Rules

Rule	Animation	Duration	Easing	Context
Allowed	Fade in / out	200–300ms	Ease-in-out	Standard show/hide
Allowed	Scale 95% → 100%	150–200ms	Ease-out	Button press / active
Allowed	Rotate 90°	250ms	Ease-in-out	Toggle / expand
Allowed	Slide (direction)	200ms	Ease-in-out	Drawer, sidebar

Rule	Animation	Duration	Easing	Context
Allowed	Glow pulse	1000–2000ms	Ease-in-out	Loading / processing
Allowed	Micro animation	100–150ms	Linear	Subtle feedback
NEVER	Bounce	Any	Any	Too playful
NEVER	Shake / Wiggle	Any	Any	Not brand-appropriate
NEVER	Fast flash	Any	Any	Epilepsy risk, unprofessional
NEVER	Cartoon spin	Any	Any	Not engineering style

Icon Do & Don't

DO	DON'T
✓ Use outline style (line icons) as default	✗ Use cartoon or decorative icons
✓ Same stroke weight across all icons (1.5px @ 24px)	✗ Mix icon styles from different icon sets
✓ Design on correct grid size (24×24 or 32×32)	✗ Use colorful or gradient-filled icons
✓ Use approved brand colors only	✗ Use inconsistent stroke weights
✓ Consistent corner radius (2px)	✗ Use filled icons without functional reason
✓ Simple, geometric, instantly recognizable	✗ Design icons outside the grid system
✓ Apply soft shadow only when floating	✗ Apply heavy shadow or neon glow
✓ Use blue glow only for active/hover states	✗ Use bounce, shake, or fast animations

KOLEEX

SECTION 16

COLOR SYSTEM

Brand Colors, Palette & Usage Rules

16

The Koleex color system is built on a strict black-and-white foundation with structured gray tones and a single accent blue. Color is used functionally — not decoratively. Every color serves a specific purpose.

Color Philosophy

> *"Color must communicate, not decorate. Black and white are the foundation. Every additional color must earn its place with a functional purpose."*

Primary Brand Colors

Black	White	Dark	
#000000	#FFFFFF	#0D0D0D	#F7F7F7

Gray Scale Palette

Koleex uses a structured 10-step gray scale. These grays provide hierarchy, depth, and separation without introducing color. Every gray value has a defined purpose.

Gray 900	Gray 800	Gray 700	Gray 600
#111111	#1A1A1A	#2E2E2E	#444444
Gray 500	**Gray 400**	**Gray 300**	**Gray 200**
#666666	#888888	#AAAAAA	#CCCCCC
Gray 100	**Gray 50**		
#E0E0E0	#F0F0F0	#F7F7F7	#F7F7F7

Accent Color — Blue

Accent Blue	Blue Dark	Blue Light	Blue Muted
#0066FF	#0052CC	#3385FF	#CCE0FF

Important: Accent Blue (#0066FF) is the ONLY non-neutral brand color. It must never be used purely decoratively — only for interactive UI elements, CTAs, links, and functional highlights.

Color Usage Rules by Context

Context	Background Rule	Color Application
Digital UI — Dark Mode	Background: #000000 / #0D0D0D	Text: #FFFFFF, Cards: #111111, Borders: #2E2E2E
Digital UI — Light Mode	Background: #FFFFFF / #F0F0F0	Text: #000000, Cards: #F0F0F0, Borders: #CCCCCC
Documents & Reports	Background: #FFFFFF	Text: #000000, Headers: Black bg + White text
Posters & Print	Primary: Black or White bg	Text reversed for contrast, accents minimal
Exhibition & Interior	Base: Black/White/Gray	LED Blue accent only — no paint colors
Packaging	Background: White or Black	Single accent max, logo + black text
Social Media	Dark or Light consistent theme	Maximum 3 color values per design

Color Do & Don't

DO	DON'T
✓ Use black and white as the primary system	✗ Add random colors to designs
✓ Use gray tones for hierarchy and depth	✗ Use gradients as primary design elements
✓ Use Accent Blue sparingly for interactive elements	✗ Mix multiple accent colors
✓ Maintain high contrast (4.5:1 minimum for text)	✗ Use low-contrast color combinations
✓ Use white text on dark backgrounds	✗ Use bright colors on backgrounds
✓ Use black text on white/light backgrounds	✗ Use Accent Blue for non-interactive decoration

Accessibility — Contrast Standards

Color Pair	Ratio	Compliance Note
Black (#000000) on White (#FFFFFF)	21:1	Maximum contrast — always use for body text
White (#FFFFFF) on Black (#000000)	21:1	Inverted — headings, UI on dark
Accent Blue (#0066FF) on White	5.3:1	Passes AA — acceptable for interactive text
Gray 500 (#666666) on White	5.7:1	Passes AA — acceptable for secondary text

Color Pair	Ratio	Compliance Note
Gray 400 (#888888) on White	3.5:1	Fails AA for small text — use only for large
Gray 300 (#AAAAAA) on White	2.3:1	Decorative only — never for text content

KOLEEX

SECTION 17

UI / UX DESIGN SYSTEM

Interface Design System & Components

17

The Koleex UI design system is based on minimal design, clean layout, strong typography, soft shadows, and high contrast interfaces — premium industrial software.

UI Design Philosophy

Dark	Light	B&W;+1	8px
Primary Mode	Secondary Mode	Color System	Base Spacing Grid

UI Visual Style

UI SHOULD FEEL	UI MUST NEVER FEEL
✓ Minimal and clean — no visual noise	✗ Colorful with many competing colors
✓ Modern and technological — premium software feel	✗ Crowded or complex layouts
✓ Structured — every element in the right place	✗ Cartoonish or consumer-app style
✓ Dark mode primary, light mode secondary	✗ Old style (Windows XP / dated)
✓ Soft shadows — not heavy or dramatic	✗ Heavy drop shadows
✓ Rounded corners — not sharp-edged	✗ Neon colors or heavy gradients
✓ Large spacing — generous breathing room	✗ Random spacing or random icon styles
✓ Clear hierarchy — most important reads first	✗ Too many borders or too many dividers
✓ Smooth animations — Apple / Tesla style only	
✓ Glass / blur effects — used sparingly	

UI Color System

Background	Surface	Border	Primary Text
#FFFFFF	#F5F5F5	#E0E0E0	#000000
BG Dark	**Surface Dark**	**Border Dark**	**Sec. Text**
#0A0A0A	#141414	#2A2A2A	#666666
Accent Blue	**Success**	**Error**	**Warning**

#0066FF	#00CC66	#FF3333	#FFCC00

Role	Light Mode	Dark Mode	Usage
Background	#FFFFFF	#0A0A0A	Main screen background
Surface	#F5F5F5	#141414	Cards, panels, containers
Border	#E0E0E0	#2A2A2A	Dividers, outlines
Primary Text	#000000	#FFFFFF	Main content text
Secondary Text	#666666	#888888	Captions, labels, hints
Accent Blue	#0066FF	#0066FF	Primary action, CTA, links
Success Green	#00CC66	#00CC66	Positive status indicators
Error Red	#FF3333	#FF3333	Error states only
Warning Yellow	#FFCC00	#FFCC00	Warning states only

Border Radius System

Value	Usage
2px — XS	Tags, small badges, status labels
4px — S	Inputs, small buttons, chips, selects
8px — M	Standard buttons, cards (default)
12px — L	Large cards, panels, modals
16px — XL	Feature cards, large containers
999px — Full	Pills, circular buttons, avatar shapes

Shadow System

Level	CSS Value	Usage
None	No shadow	Flat elements — borders preferred over shadows
XS	0 1px 2px rgba(0,0,0,0.05)	Subtle card lift
S	0 2px 8px rgba(0,0,0,0.08)	Card and panel default shadow
M	0 4px 16px rgba(0,0,0,0.12)	Dropdown, popover
L	0 8px 32px rgba(0,0,0,0.16)	Modal, drawer overlay

Level	CSS Value	Usage
XL	0 16px 48px rgba(0,0,0,0.20)	Full-page overlay

Button System

Size	Height	Padding H	Font Size	Radius
XS	28px	10px	11px	4px
S	32px	12px	12px	6px
M (Default)	40px	16px	14px	8px
L	48px	20px	15px	10px
XL	56px	24px	16px	12px

Type	Style	Usage
Primary	Black fill, white text	Main call-to-action
Secondary	White fill, black border	Secondary actions
Outline	Transparent, colored border	Alternative option
Ghost	Transparent, no border, colored text	Subtle actions
Icon Button	Square, icon only	Toolbars, compact UI
Destructive	Red fill or red border	Delete / irreversible actions

Input Fields System

Input field types supported in the Koleex UI system:

Text	Number	Email	Password
Search	Dropdown / Select	Date / Time	File Upload
Multi-line Textarea	Toggle Switch	Checkbox	Radio Button
Country Selector	City Selector	Range Slider	Color Picker

Cards System

Cards are used across the interface for the following contexts:

Dashboard	Reports	Products	Statistics
CRM	Customers	Machines	Orders
Analytics	Settings	Documents	Notifications

Sidebar System

Property	Specification
Style	Dark background, minimal design
Content	Icons + text labels
Expanded Width	240px
Collapsed Width	72px
Features	Collapsible, hover highlight, active/selected highlight
Structure	Top: Logo — Middle: Navigation — Bottom: User profile
Scroll	Scrollable navigation when items overflow
Reference	Apple, Notion, Linear, Tesla software

Charts System

Charts and data visualizations must be minimal and functional:

- Supported: Line chart, Bar chart, Pie chart, Area chart, KPI cards, Analytics dashboard
- Chart colors: Blue (#0066FF), Gray, Light blue, Green, Orange, Red — no rainbow charts
- Chart backgrounds: White (light mode) or Dark (dark mode)
- Chart grid lines: Very light — subtle guidance only
- Chart labels: Small, Helvetica, high contrast

UI Animations & Transitions

- All animations must be smooth, slow, minimal, and professional
- Apple style or Tesla style motion — never cartoon or bouncy
- Duration: 100ms (micro) → 200ms (standard) → 300ms (component) → 500ms (page)
- Easing: Ease In Out, Ease Out, Cubic Bezier — No linear motion for UI
- Supported: Hover, press, page transition, modal, dropdown, sidebar, loading

UI Do & Don't

DO	DON'T
✓ Use grid and spacing system always	✗ Random colors anywhere
✓ Use Helvetica Neue throughout	✗ Too many gradients
✓ Use minimal colors — black, white, gray primary	✗ Heavy drop shadows

✓ Use soft shadows	✗ Cartoon icons
✓ Use rounded corners consistently	✗ Too many borders
✓ Use structured layout	✗ Small or cramped spacing
✓ Use outline icons	✗ Crowded UI layout
✓ Support dark mode	✗ Multiple fonts
✓ Use large spacing	✗ Neon colors
✓ Use Apple-style design	✗ Windows-old style UI

KOLEEX

SECTION 18

WEBSITE & LANDING PAGE GUIDELINES

Web Design System & Standards

18

The Koleex website must look like a global technology and industrial company website — minimal, structured, modern. References: Apple.com, Tesla.com, Sony.com, Intel.com.

Website Design Philosophy

MINIMAL	STRUCTURED	12-COLUMN GRID	DARK / LIGHT	MOBILE FIRST	SMOOTH ANIMATIONS

Standard Website Structure — 12 Sections

01 Hero Full-width, large typography, key visual or video	**02 About** Brief overview and brand positioning	**03 Segments** Manufacturing, tech, automation, trade
04 Technology Technology highlights and capabilities	**05 Products** Product and system showcase	**06 Software** Software platform overview
07 Global Map and global market presence	**08 News** Latest company updates and press	**09 Partners** Partner logo grid
10 Careers Job opportunities	**11 Contact** Contact form and information	**12 Footer** Navigation, legal, social links

Hero Section Rules

- Dark background or white background — high contrast only
- Large bold title — one to two lines maximum
- Very short subtitle — one line only
- One main image, video, or abstract technology background
- Maximum two CTA buttons — primary and secondary
- Large empty space — never crowded hero
- Content: center-aligned or left-aligned
- Smooth gradient, glow, or industrial imagery background allowed
- Never: too many elements, small text, or cluttered layout

Website Typography Hierarchy

Level	Size	Weight	Usage
H1 — Hero Title	56–80px	Bold	Hero section main message

Level	Size	Weight	Usage
H2 — Section Title	36–48px	Bold	Each section's main heading
H3 — Subsection	24–32px	Semibold	Content subsections and cards
H4 — Card Title	18–22px	Medium	Individual card or item titles
Body	15–17px	Regular	Content paragraphs
Caption	12–13px	Regular / Light	Labels, hints, metadata

Button Styles

• Primary: Black fill, white text — main CTA
• Secondary: White fill, black border — secondary action
• Ghost: Transparent, white text — on dark sections
• Text button: No background — link-style actions

Menu / Navigation Style

• Minimal and clean top navigation bar
• Logo positioned on the left
• Navigation items: center or right
• Login / language on the far right
• Search icon: optional
• Sticky navigation on scroll
• Transparent background on hero section
• White or black background on scroll
• Light bottom border when scrolled

Menu Items: About · Technology · Products · Systems · News · Careers · Contact

Footer Style

• Dark background — black or near-black
• Logo positioned top left
• 3 or 4 column grid layout
• Columns: Company info — Products — Quick Links — Contact
• Social media icons — minimal, small
• Copyright and legal links at the very bottom
• Small typography — clean and structured

Product Page Layout

- Product hero image — full width or left side
- Product name — large, bold
- Short description — 2 to 3 lines maximum
- Key features — bullet list or icon grid
- Full technical specifications — structured table
- Image gallery — grid or slider
- Product videos
- Application examples
- Downloads (manual, datasheet)
- Related products
- Contact / Inquiry form at bottom

Landing Page Rules

- Futuristic and minimal — dark gradient preferred
- Glow lighting and abstract backgrounds allowed
- Large typography with maximum impact
- Full-screen sections with scroll reveal
- Video background allowed on hero
- Glass / blur effects allowed sparingly
- Smooth scroll animations throughout
- Used for: product launch, new technology, exhibition, campaign, AI systems

Website Do & Don't

DO	DON'T
✓ Grid system everywhere	✗ Cheap e-commerce template style
✓ Large spacing and typography	✗ Colorful or crowded layout
✓ Black and white primary	✗ Too many popups or banners
✓ High quality industrial imagery	✗ Heavy shadows or gradients
✓ Soft scroll animations	✗ Multiple fonts
✓ Consistent Helvetica Neue	✗ Random section layouts
✓ Mobile responsive design	✗ Cheap stock photography

KOLEEX

SECTION 19

SOCIAL MEDIA DESIGN GUIDELINES

Post Design System & Platform Rules

19

Koleex social media design must follow the same brand identity: minimal, clean, structured, technological, and professional. Posts look like technology company communication — not like ads.

Social Media Design Philosophy

5	B&W;+1	Top Left	Helvetica
Post Layouts	Color Rule	Logo Position	Only Font

Standard Post Layouts

Layout 01 — Announcement Full black background, large white title, logo top left	**Layout 02 — Professional** Full white background, black typography, minimal elements
Layout 03 — Product / Tech Dark gradient, technology image, text overlay	**Layout 04 — Feature Split** Half image / half text block layout
Layout 05 — Visual-First Full image with minimal text overlay + logo	

Logo Placement on Posts

Position	Rule
Top Left	Most recommended — standard for all posts
Top Center	For announcement and centered-layout posts
Bottom Left	For image-dominant posts
Never	Random position, too close to edge, too big, too small, on busy image area

Typography in Social Media

- Use large, bold titles — short and direct
- Short subtitle or caption only — never long paragraphs
- Left-align or center-align — never right-align
- Title: Bold — Subtitle: Regular — Caption: Light
- Large spacing between text elements
- Maximum 2 font weights per post
- Avoid multiple text blocks on one post

Background & Image Styles

- 1. Pure black (primary)
- 2. Pure white (primary)
- 3. Dark gradient
- 4. Light gradient
- 5. Industrial / machine photo
- 6. Abstract technology background
- 7. Lines / grid background
- 8. Glow gradient background
- 9. Glass / blur effect (sparingly)
- 10. Minimal texture
- 11. Large negative space background

Images must be: High quality, industrial machines, engineering environment, technology/product shots, dark studio lighting, no colorful stock photos, no cartoon

Instagram Grid Strategy

- Alternate: Black post → White post → Product → Technology
- Grid should show structured visual rhythm when viewing the profile
- Use consistent templates for recognizable brand posts
- Each post type has its own layout — no random freestyle posts

Text Writing Rules for Posts

- Short, professional, and confident
- Technical and industrial language
- Use approved brand vocabulary (see Section 09)
- Avoid: cheap marketing language, discount language, emotional language, slang
- Avoid: too many emojis, too many hashtags

Social Media Do & Don't

DO	DON'T
✓ Minimal layout, large typography	✗ Too many colors or gradients
✓ Black or white backgrounds primary	✗ Crowded layout with many elements
✓ Industrial and technology imagery	✗ Cheap marketing ad style
✓ Grid-aligned every post	✗ Colorful promotional posts

✓ Logo top left or top center	✗ Random fonts or icon styles
✓ Consistent brand colors and fonts	✗ Different layout style every post
✓ Helvetica Neue throughout	✗ Long text paragraphs on posts
	✗ Low quality images

KOLEEX

SECTION 20

POSTER & PRINT DESIGN GUIDELINES

Print Design System & Standards

20

Poster Design Philosophy

Koleex posters follow minimal, structured, and technology-oriented design principles. Posters should look like technology company communication — similar to Apple, Sony, or industrial exhibition visuals — never like discount advertising or crowded flyers.

Poster Structure System

Structure	Description
Structure A	Full black background, large centered title, minimal elements, logo at top or bottom
Structure B	Full white background, black typography, generous margins, single graphic element
Structure C	Split — upper image area, lower typography and information zone
Structure D	Full-bleed industrial or technology image with minimal text overlay
Structure E	Grid-based layout with multiple structured content zones

Poster Typography Rules

Element	Style	Notes
Main Title	Bold, very large	Single line preferred — maximum visual impact
Subtitle	Regular, medium	One to two lines maximum
Body / Description	Light, small	Keep very short — minimum text only
Date / Event Info	Regular, small	Bottom zone or secondary position
Logo	Standard size	Top left, top center, or bottom center

- Titles: Bold only
- Subtitles: Regular weight
- Body: Light weight
- Use short text — avoid long paragraphs
- Strong hierarchy throughout
- Large spacing between text blocks
- Left-align or center-align — never justified text

Poster Background System

- 1. Pure Black (primary)
- 2. Pure White (primary)

- 3. Dark Gradient — black to dark gray
- 4. Light Gradient — white to light gray
- 5. Abstract Technology Background
- 6. Industrial or Machine Photo
- 7. Lines / Grid Background
- 8. Glow Gradient
- 9. Glass / Blur Background (sparingly)
- 10. Negative Space Background
- 11. Minimal Texture

Negative Space System

> **Negative space is not empty space — it is intentional design.** Koleex posters should use large areas of empty space to create a premium, Apple-like quality.

- Do not fill the entire poster with content
- Leave large empty areas especially around the main title
- Use generous margins on all edges
- The product or key visual must have clear space around it
- Do not crowd elements — fewer elements = stronger design
- Empty space focuses attention on what matters

Logo Placement on Posters

Position	Notes
Top Left	Standard corporate poster — most common
Top Center	Announcement or event poster — centered layouts
Bottom Left	When image fills the top area
Bottom Center	Minimal single-focus poster
Never on right side	Breaks the natural reading flow

Logo size: Small · Not dominant · Not too small · Always maintain clear space · Align to grid

Print Materials System

Material	Specifications / Usage
A0 / A1 Poster	Exhibition, showroom, large format outdoor
A2 / A3 Poster	Office, event, indoor display

Material	Specifications / Usage
A4 / A5 Flyer	Distribution, handouts, events
Business Card	85×55mm, black/white minimal
Company Brochure	Tri-fold or bifold, structured grid
Product Catalog	Grid-based product showcase
Roll-up Banner	85×200cm, vertical layout, logo top
Billboard	Minimal text, large visual, maximum impact
Company Profile	A4 booklet, premium print quality
Exhibition Panels	A1, structured information layout
Certificates	A4, formal layout, embossed logo
Invitation Cards	Premium matte, minimal design

All print materials must follow: Same typography · Same colors · Same layout system · Same logo rules · Same spacing · Same grid system · Same minimal style

Poster & Print Do & Don't

DO	DON'T
✓ Use grid system	✗ Do not use too many colors
✓ Use large spacing	✗ Do not use crowded layout
✓ Use minimal layout	✗ Do not use too many fonts
✓ Use Helvetica Neue	✗ Do not use random layout
✓ Use black & white	✗ Do not use cartoon graphics
✓ Use industrial images	✗ Do not use too many icons
✓ Use technology backgrounds	✗ Do not use bright backgrounds
✓ Use negative space	✗ Do not use low quality images
✓ Use structured layout	✗ Do not place logo randomly
✓ Align everything	✗ Do not stretch images
✓ Place logo top left	✗ Do not use heavy shadows

✓ Keep design clean	✗ Do not use too many gradients
✓ Keep text minimal	✗ Do not write long text
✓ Use large titles	✗ Do not clutter poster
✓ Use high quality images	

KOLEEX

SECTION 21

PACKAGING & LABELS GUIDELINES

Industrial Packaging Design System

21

Koleex packaging must reflect a professional industrial technology company — minimal, clean, structured. Not luxury retail, not consumer flashy, not colorful.

Packaging Design Philosophy

Matte	B&W; Only	Structure d	QR + Barcode
Primary Finish	Color System	Grid Layout	Required On All

Packaging Color & Material System

White Box Primary — clean product packaging, small devices	**Black Box** Primary — premium product packaging	**Dark Gray Box** Primary — industrial equipment packaging
Light Gray Box Secondary — standard product boxes	**Kraft Carton** Shipping — external packaging, eco-friendly	**Metal / Silver Label** Label — nameplate, serial number label

Packaging Layout Structure — Front Side

- Logo: Top center — prominent but balanced
- Product name: Center — large bold
- Model / Code: Below product name — medium weight
- Tagline: Below model — optional, very small
- Minimal decorative elements only
- White or black background — no gradients

Box Side Layout

Side panels contain:

- Model number
- Barcode
- QR code
- Serial number
- Manufacturing date and info
- Company name and website
- Country of origin

• Certification icons
• Handling icons

Box Back Layout

Back panel contains:

• Product specifications
• Technical description
• Safety instructions
• Certification marks (CE, RoHS)
• Company contact information
• QR code (links to product page)
• Structured layout with grid — never random

Labels System

Every Koleex product must have a structured, professional label:

• Logo — small, top of label
• Product name and model number
• Serial number (unique per unit)
• Electrical specifications (voltage, power, frequency)
• Manufacturing date
• QR code for product page / manual
• Barcode for inventory tracking
• Company name and country of origin
• Certification icons (CE, RoHS, etc.)
• Warning icons as required

Label Style: White background · Black text · Helvetica Neue · Structured grid · Minimal design · Clear information hierarchy · Black border optional

Barcode & QR Code Rules

Property	Rule
Barcode Position	Side of box, back of box, bottom of box, or label area
QR Code Position	Near barcode, back of box, label, manual, machine body label, warranty card
QR Code Links To	Product page, manual, software download, support page, company website, product video
Size	Must be scannable — minimum 2.5cm × 2.5cm

Property	Rule
Color	Black on white only — never inverted or colored

Packaging Materials & Finishes

Finish	Usage
Matte	Preferred — professional, minimal feel across all materials
Glossy	Small boxes only — limited use
Metal Brushed	Labels and nameplates — premium industrial look
Engraved Logo	Metal plates and premium boxes — allowed
Emboss Logo	Raised logo on box surface — allowed
Deboss Logo	Pressed-in logo on box — allowed

Icons on Packaging

- Fragile
- Keep Dry
- This Side Up
- Handle With Care
- Temperature Range
- Do Not Stack
- CE Certification
- RoHS Compliance
- Recycling Symbol
- Made In / Country of Origin
- Electrical Warning
- Weight and Dimensions

All packaging icons must follow the Koleex Icon System style.

Packaging Layout — Alignment Rules

Always align elements to grid.

Allowed alignment:

- Left aligned
- Center aligned
- Grid aligned

Not allowed:

- Random alignment
- Floating elements
- Misaligned logo
- Text not aligned
- Image not aligned
- Random spacing

Packaging Layout Do & Don't

DO	DON'T
✓ Use grid system	✗ Do not place elements randomly
✓ Use large margins	✗ Do not crowd layout
✓ Use white space	✗ Do not use random spacing
✓ Align everything	✗ Do not misalign text
✓ Keep layout clean	✗ Do not stretch images
✓ Keep layout minimal	✗ Do not fill all space
✓ Follow spacing system	✗ Do not use too many elements
✓ Keep hierarchy clear	✗ Do not mix layout styles
✓ Logo aligned with grid	✗ Do not place logo randomly
✓ Use structured layout	✗ Do not ignore margins

KOLEEX

SECTION 22

EXHIBITION BOOTH & INTERIOR DESIGN

Spatial Brand Experience

Koleex exhibition booths and interiors must look like a technology and industrial innovation company — futuristic, minimal, industrial. Reference: Apple Store, Tesla showroom, Sony exhibition.

Design Philosophy

TECHNOLOGY SHOWROOM	METAL + GLASS	LED LIGHTING	MINIMAL PRODUCT DISPLAY	SCREEN-BASED DEMOS	LARGE BRAND WALL

Booth Color System

Color / Material	Application
Black	Primary — walls, floor, back panels
White	Primary — surfaces, display plinths
Dark Gray	Secondary — structural elements
Light Gray	Secondary — accent surfaces
Metal / Aluminum	Materials — structural and decorative
Glass / Transparent	Materials — display cases, partitions
LED White	Lighting — primary, cool white
LED Blue Accent	Lighting — edge lighting, accent glow only

Booth Materials

Material	Application
Metal / Aluminum	Wall panels, display frames, structural elements
Tempered Glass	Product display cases, partitions, screen panels
High-gloss White	Ceiling panels, light diffusion surfaces
Matte Black	Floor, back walls, display plinths
LED Strip Lighting	Edge lighting, panel borders, floor guides
Acrylic Panels	Backlit brand panels, product information displays

Booth Layout Zones

Zone	Description
Reception Zone	Front center — brand logo, welcome desk, company introduction
Product Display Zone	Center and sides — machines and products on display plinths
Technology Zone	Screen wall — software demos, system UI, technology presentations
Meeting Zone	Rear — seating area, discussion table, private meetings
Brand Wall	Back wall — extra-large KOLEEX logo, slogan, brand visuals

Logo in Exhibition Booth

Logo Types: Backlit logo · Acrylic logo · Metal logo · LED logo · Glass logo · Screen logo

Location	Placement Rule
Main Brand Wall	Extra large — dominant, back wall center
Reception Desk	Front face of desk — medium, centered
Entrance Sign	Top of booth — large, highly visible
Product Plinths	Small label on plinth face or base
Screen Displays	Splash/idle screen — centered

Lighting System

Types of lighting:

- White LED ceiling
- Spotlights on machines
- Backlight logo
- LED lines on walls
- LED floor lines
- LED strips behind panels
- Under machine lighting
- Glass lighting
- Screen lighting
- Accent blue light
- Gradient light panels

Lighting must be:

- Soft
- Clean

- Modern
- Technology style
- Not colorful
- Not too dark
- Not too bright
- Not disco lighting
- Not random colors

Furniture Style

Furniture must be:

- Minimal
- Modern
- Black / White / Gray
- Metal legs
- Glass tables
- Simple chairs
- Leather chairs
- Minimal sofas
- Square shapes
- Rounded corners
- No classic furniture
- No wooden classic furniture
- No colorful furniture
- No heavy furniture
- No decorative furniture

Furniture should look like:

- Apple office
- Tesla office
- Technology company
- Modern engineering office

Reception Desk Style

Reception should be:

- Minimal
- White or black
- Logo on front

- Backlit logo
- Hidden cables
- Clean desk
- iPad / screen
- No papers
- No mess
- Structured design
- LED under desk optional
- Glass panel optional

> Reception is very important because it is the first impression.

Machine Display Style

Machines should be displayed:

- On platform
- With lighting
- With name plate
- With small description
- With screen
- With QR code
- With spec plate
- With technology icons
- With minimal design
- With spacing between machines
- Not too crowded
- Not random placement
- Machines aligned in grid

Should Look Similar To

- Apple Store
- Tesla showroom
- Sony showroom
- Technology exhibition booth
- Modern industrial technology booth

Must NOT look like:

- Traditional machine exhibition
- Crowded booth
- Colorful booth
- Cheap exhibition design
- Wooden old style booth
- Banner everywhere
- Too many posters
- Too many colors
- Too many lights
- Messy display

Exhibition Do & Don't

DO	DON'T
✓ Use black & white theme	✗ Do not use colorful booth
✓ Use glass	✗ Do not crowd machines
✓ Use metal	✗ Do not use many posters
✓ Use LED lighting	✗ Do not use banners everywhere
✓ Use large screens	✗ Do not use random lights
✓ Use large logo	✗ Do not use cheap materials
✓ Use minimal design	✗ Do not use wooden classic booth
✓ Use structured layout	✗ Do not use messy cables
✓ Use zones	✗ Do not use different styles
✓ Use technology backgrounds	✗ Do not use too many colors
✓ Use clean walls	✗ Do not use low quality printing
✓ Use hidden storage	✗ Do not place logo randomly
✓ Use modern furniture	✗ Do not overcrowd walls
✓ Use lighting on machines	✗ Do not use old exhibition style
✓ Use brand colors only	
✓ Use grid layout	

KOLEEX

SECTION 23

MOTION & ANIMATION STYLE

Animation Guidelines & Video Style

23

Motion Design Philosophy

Koleex motion design must be minimal, smooth, technical, and precise. Motion should feel like engineering and technology — not entertainment. The animation style should feel like Apple or Tesla: slow, controlled, confident, and purposeful.

Animation Principles

Principle	Description
Purposeful	Every animation must serve a function — no decoration-only motion
Smooth	Ease-in-out curves only — never linear or bouncy
Minimal	Use restraint — less animation is always better
Fast but Soft	Short duration with gentle easing
Consistent	Same timing and easing applied across all components
Technical	Feels like engineering system, not entertainment

Duration System

Duration	Level	Usage
100ms	XS — Micro	Hover state, toggle, focus ring change
200ms	S — Standard	Button press, dropdown open, tab switch
300ms	M — Component	Modal open/close, sidebar collapse
500ms	L — Page	Route change, section scroll reveal
800ms	XL — Feature	Logo intro, hero section reveal
2000ms+	Ambient	Background motion, slow parallax

Easing Rules

- Ease In Out — for all standard UI animations
- Ease Out — for elements entering the screen
- Cubic Bezier — for precise custom curves
- Smooth curve only — no linear motion in UI
- Never use: bounce, elastic, back, or spring easing

Logo Animation Rules

Logo animation should be:

• Minimal
• Fade in
• Letter reveal
• Line draw
• Glow reveal
• Light sweep
• Scale very small
• Blur to sharp
• Rotation small
• Sliding letters
• Grid build
• Outline drawing
• Light lines forming logo

Not allowed:

• Bounce logo
• Fire effects
• Explosion
• Too many particles
• Fast spin
• Cartoon animation
• Color changing logo
• Heavy glow
• Neon flashing

> **Logo animation should feel:** Technology company intro / Engineering company / Industrial systems

UI Animation Rules

UI animations should include:

• Hover highlight
• Button press
• Sidebar collapse
• Page transition
• Modal open
• Dropdown open
• Toggle switch

- Loading spinner
- Notification slide
- Tab switch
- Card hover
- Tooltip fade
- Scroll reveal

UI animation must be:

- Smooth
- Fast but soft
- Minimal
- Clean
- Apple style
- Tesla style
- Not noticeable but felt

Website Animation Rules

Allowed website animations:

- Fade in sections
- Slide up content
- Image reveal
- Text reveal
- Parallax light
- Background move slow
- Blur to focus
- Hover zoom image
- Button hover
- Smooth scrolling
- Section transitions
- Loading screen
- Menu animation
- Sticky header animation

Not allowed:

- Too many animations
- Flashing elements
- Too fast animations
- Too many parallax layers

- Flying objects
- Cartoon animation
- Random animation
- Gaming style animation

Video Style

Koleex videos should be:

- Dark background
- Light lines
- Glow lines
- Technology grid
- Industrial shots
- Machine slow motion
- Close up metal
- Factory shots
- System UI shots
- Minimal text
- Large typography
- Fade transitions
- Light transitions
- Smooth camera movement
- Slow motion
- Industrial sounds
- Electronic sounds
- Ambient sound
- No loud music
- No funny effects
- No colorful effects

Video style should feel like:

- Technology company
- Industrial innovation
- Engineering systems
- Future technology
- Smart machines
- Automation systems

Motion Do & Don't

DO	DON'T
✓ Use smooth animation	✗ Do not use bounce
✓ Use fade	✗ Do not use cartoon animation
✓ Use slide	✗ Do not use fast animation
✓ Use small scale	✗ Do not use flashing lights
✓ Use blur	✗ Do not use random motion
✓ Use glow lightly	✗ Do not use many effects
✓ Use slow motion	✗ Do not use neon everywhere
✓ Use minimal motion	✗ Do not use gaming animation
✓ Use consistent animation	✗ Do not use funny animation
✓ Use professional motion	✗ Do not use explosion effects
✓ Use Apple style motion	✗ Do not use heavy particles
✓ Use Tesla style motion	✗ Do not use rotating objects randomly
✓ Use engineering style motion	✗ Do not use inconsistent animation
✓ Keep animations subtle	✗ Do not over animate UI
✓ Keep animations clean	

KOLEEX

SECTION 24

BRAND APPLICATIONS

How the Brand Appears Across All Materials

24

The Koleex brand identity must be applied consistently across all physical and digital materials. Every item representing the company must follow these brand guidelines strictly.

Brand Applications Overview

5	12+	6	16
Stationery Types	Digital Applications	Vehicle Types	Giveaway Items

Corporate Stationery

Style: White background · Black text · Minimal layout · Logo top left · Helvetica Neue · Large margins · Clean grid · Thin divider lines only

Business Card	Letterhead	Envelope	Folder
Notebook	Pen	ID Card	Employee Badge
Invoice	Quotation	Purchase Order	Contract
Certificate	Warranty Card	Presentation Template	Report Template
Company Profile	Product Catalog	Manual Cover	Email Signature

Business Card Specifications

Element	Specification
Size	85 × 55 mm standard
Front — Background	Black (primary) or White (secondary)
Front — Content	Logo centered or top — minimal
Back — Name	Full name, bold, centered or left
Back — Title	Job title, regular weight
Back — Contact	Email · Phone · Website — small, light weight
Style	White card · Black text · No colors · No icons · No crowded info
Typography	Helvetica Neue — Bold for name, Regular for contact
Finish	Matte preferred — spot UV on logo optional

Email Signature

Email signature structure:

- Full Name — Bold
- Job Position — Regular
- Koleex International Group
- Phone number
- Email address
- Website URL
- Physical address (optional)

Style: Black text · Gray secondary text · Small logo left · No large banner images · No colors · Clean layout · Helvetica Neue

Company Documents

Document types include:

- Invoice
- Quotation
- Purchase Order
- Contract / Agreement
- Delivery Note
- Packing List
- Certificate
- Warranty Card
- Reports
- Presentations
- Official Letters

Document style: Logo top left · Title at top · Footer with company info · Page number bottom · Helvetica Neue · Structured tables · Black & white · Large margins · Clean thin borders · No colors except gray

Vehicle Branding

Vehicle types: Delivery trucks, Company cars, Service vans, Logistics vehicles, Forklifts, Containers, Trailers

- Logo on both sides and rear
- Black or white vehicle preferred
- Minimal text — company name, website, phone only
- No colorful graphics or decorative decals
- Vinyl wrap: matte finish preferred
- Simple, professional — technology company look

Uniforms

Uniform types:

• Office uniform
• Factory uniform
• Exhibition uniform
• Service uniform
• Engineer uniform
• Logistics uniform

Uniform colors:

• Black
• White
• Gray
• Dark blue
• No bright colors

Logo placement:

• Left chest
• Back large logo
• Sleeve small logo
• Cap logo
• Badge
• ID card

Uniform style:

• Minimal
• Professional
• Clean
• Industrial
• Technology company
• Not colorful
• Not too many logos

Giveaway Items

Koleex branded giveaway items:

Pen	Notebook	USB	Power bank
Mouse pad	Water bottle	Mug	T-shirt

Cap	Bag	Flash drive	Keychain
Phone holder	Lanyard	Badge holder	Folder
Sticker	Box cutter	Tape	Tool kit
Measuring tape	Laser pointer	Safety helmet	Gloves
Backpack	Umbrella		

Giveaway design rules:

• Minimal
• Black / White / Gray
• Logo only
• No graphics
• No gradients
• No colorful printing
• Clean typography
• Centered logo
• Small logo
• Professional look
• Industrial style

Digital Brand Applications

Brand must be applied on:

• Website
• Mobile app
• Desktop software
• Dashboard
• CRM system
• ERP system
• Machine UI
• Loading screen
• Splash screen
• Login screen
• Icons
• Buttons
• Emails
• Newsletter
• PDF documents

- Digital catalogs
- Presentations
- Social media
- Videos
- Ads
- Screens
- Exhibition displays
- Touch screens
- Kiosks

> **All digital products must follow:** UI system · Typography system · Color system · Icon system · Grid system · Motion system

Product Branding

Koleex branding should appear on:

- Machines
- Devices
- Screens
- Control panels
- Labels
- Metal plates
- Stickers
- Packaging
- Manuals
- Warranty
- Software
- Startup screen
- App icon
- Product boxes
- Accessories
- Spare parts packaging

Logo placement on products:

- Front
- Side
- Metal plate
- Screen boot logo

- Label
- Sticker
- Engraved
- Printed
- Embossed
- Debossed

Brand Applications Summary

Koleex brand identity applies to:

Physical:

- Products
- Machines
- Packaging
- Boxes
- Labels
- Manuals
- Stationery
- Vehicles
- Uniforms
- Office signage
- Exhibition booths
- Showrooms
- Tools
- Giveaways
- Business cards
- Certificates
- Office interior
- Factory signage
- Warehouses
- Containers

Digital:

- Website
- Mobile apps
- Software
- Dashboards
- Machine UI

- Presentations
- PDFs
- Social media
- Videos
- Ads
- Email signature
- Documents
- Reports
- Catalogs
- Company profile
- Investor presentations

> Everything must follow the same brand guidelines.

Stationery Style

- White background
- Black text
- Minimal layout
- Logo top left
- Helvetica Neue
- Large margins
- Clean layout
- Structured grid
- Small logo
- Thin lines
- Gray secondary text

SECTION 25

BRAND TOUCHPOINTS

Every Place the Brand Appears

Brand touchpoints are all interactions where customers, partners, employees, or the public interact with the Koleex brand. Every touchpoint must reflect the Koleex identity.

Brand Touchpoints Overview

> *"Every single point where someone encounters Koleex — online, offline, physical, or digital — must reflect the same professional, minimal, and technological identity without exception."*

Customer Touchpoints

Stage	Touchpoints
Pre-Sale	Website, social media, ads, exhibitions, brochures, videos
First Contact	Email signature, business card, company profile, presentations
Proposal / Quote	Quotation document, proposal PDF, technical catalog
Purchase	Invoice, order confirmation, contract
Delivery	Packaging, shipping label, delivery note
Post-Sale	Manual, warranty card, support portal, follow-up email
Ongoing	Newsletter, updates, social media, events

Partner & Distributor Touchpoints

Stage	Touchpoints
Introduction	Company profile, product catalog, partner presentation
Agreement	Contract, partner documents
Operations	Partner portal, training materials, product manuals
Communication	Email signature, branded reports, updates
Events	Exhibition materials, co-branded content

Employee Touchpoints

Stage	Touchpoints
Hiring	Job posting, email, offer letter
Onboarding	ID card, badge, uniform, company handbook
Daily Work	Email signature, internal systems, software UI
Events	Uniform, name badge, company event materials
External	Business card, presentation template, stationery

Physical Brand Touchpoints — Complete List

- Products
- Machines
- Devices
- Packaging
- Boxes
- Labels
- Manuals
- Warranty cards

- LinkedIn
- Facebook
- Instagram
- YouTube

- Videos
- Ads
- Banners
- Online catalogs
- PDF documents
- Presentations
- Company profile
- Reports
- Blog
- Download center
- Support portal
- CRM
- ERP
- Customer portal
- Partner portal
- Cloud platform
- IoT platform
- Monitoring system
- AI system interface
- Training videos
- Webinars
- Online meetings background
- Digital certificates

Brand Experience Philosophy

The Koleex brand experience must always feel:

- Professional
- Organized
- Clean
- Minimal
- Technological
- Structured
- Reliable
- Engineering company
- Global company
- Industrial technology
- Innovative

- System oriented
- Future focused
- Precise
- High quality
- Consistent
- Serious
- Confident
- Not loud
- Not colorful
- Not messy
- Not cheap

> When someone interacts with Koleex brand, they should feel: This is a global industrial technology group.

Brand Touchpoints Summary

Every place where the brand appears must follow the brand guidelines.

Brand Appears On:

Physical:

- Products
- Packaging
- Labels
- Manuals
- Offices
- Exhibition
- Vehicles
- Uniforms
- Stationery
- Posters
- Gifts
- Tools
- Buildings
- Signs

Digital:

- Website
- Apps
- Software

- Dashboards
- Social media
- Videos
- Emails
- PDFs
- Presentations
- Systems
- Platforms

> Everything must look like one company, one system, one identity.

KOLEEX

SECTION 26

FILE STRUCTURE & NAMING SYSTEM

File Organization & Naming Conventions

Master Brand Folder Structure

All Koleex brand files must be organized in a consistent master folder structure:

Folder	Contents
01 Logo	All logo files — SVG, PNG, AI, EPS, PDF versions
02 Colors	Color palettes — AI, PDF, Figma, Pantone files
03 Typography	Font files (.otf), typography system PDF
04 Icons	All icon sets by category — SVG and PNG
05 Layout Templates	Poster, Social Media, Presentation, Document, Packaging templates
06 UI Kit	Figma UI Kit — Components, Buttons, Cards, Tables, Dashboard
07 Documentation	Brand guidelines PDF, usage rules, references

Logo Folder Files (01 Logo)

File Name	Description
koleex_logo_black_v1.svg	Primary black logo — vector
koleex_logo_white_v1.svg	Primary white logo — vector
koleex_logo_black_v1.png	Primary black logo — high-res PNG
koleex_logo_white_v1.png	Primary white logo — high-res PNG
koleex_logo_black_v1.ai	Editable Illustrator master file
koleex_logo_black_v1.eps	EPS for print suppliers
koleex_logo_black_v1.pdf	PDF version for documents
koleex_symbol_black_v1.svg	K symbol only — vector

Color & Typography Files

File Name	Description
koleex_color_palette.ai	Full color palette — Illustrator source
koleex_color_palette.pdf	Color reference — print-ready PDF
koleex_gradients.ai	Gradient definitions
koleex_ui_colors.fig	UI color system — Figma

File Name	Description
koleex_pantone.pdf	Pantone reference for print
helvetica_neue_regular.otf	Primary font — Regular weight
helvetica_neue_medium.otf	Primary font — Medium weight
helvetica_neue_bold.otf	Primary font — Bold weight
koleex_typography_system.pdf	Typography system reference

Icon Folder (04 Icons)

- Categories: System Icons · Business Icons · Industrial Icons · Technology Icons · UI Icons
- Naming: icon_[name].svg — e.g., icon_user.svg, icon_machine.svg, icon_settings.svg
- Formats: SVG (primary) and PNG (export)
- Organization: one subfolder per icon category

File Naming Convention

Format: koleex_[type]_[name]_[version].[format]

Example File Name	Explanation
koleex_logo_black_v1.svg	Logo — black version — version 1 — SVG
koleex_logo_black_final.svg	Logo — black version — final approved
koleex_poster_template_print.ai	Poster template — print version
koleex_poster_template_web.ai	Poster template — web/digital version
koleex_ui_dark.fig	UI kit — dark mode — Figma
koleex_ui_light.fig	UI kit — light mode — Figma
koleex_icon_user_v1.svg	Icon — user — version 1

Version Control

Suffix	Meaning
v1	First version
v2	Updated version
v3	Major update

Suffix	Meaning
final	Final approved version
print	Print-specific version
web	Web / digital version
dark	Dark mode version
light	Light mode version

File Format Rules by Type

File Type	Required Formats
Logo	SVG, PNG, AI, EPS, PDF
Icons	SVG, PNG
Posters	AI, PSD, PDF
Social Media	PSD, PNG
UI Design	FIG (Figma)
Documents	PDF, DOCX
Packaging	AI, PDF
Presentations	PPTX
Videos	MP4
Animation	MP4, GIF
Photos	JPG, PNG
3D Files	OBJ, FBX, STL

File Usage Rules

DO	DON'T
✓ Use official logo files only	✗ Edit original / master files
✓ Use official brand colors	✗ Rename files randomly
✓ Use official fonts	✗ Store files outside the folder structure
✓ Use provided templates	✗ Create unofficial logo variations

✓ Follow the grid system	✗ Share unfinished draft files externally
✓ Use correct file naming	✗ Use unauthorized fonts or colors
✓ Keep files in correct folder structure	
✓ Use version numbers on all files	
✓ Backup files regularly	
✓ Export copies — never share master files	

KOLEEX

SECTION 27

FINAL BRAND SUMMARY

Brand Definition, Principles & Closing

27

The final summary defines the complete Koleex brand identity — what we are, how we look, how we sound, and the 28 non-negotiable principles that govern every brand expression.

Final Brand Definition

> *"Koleex International Group is a global industrial and technology group focused on systems, engineering, automation, software, manufacturing, and international trade. The identity is minimal, professional, technological, and globally positioned across all physical and digital platforms."*

Brand Positioning Statement

GLOBAL INDUSTRIAL & TECHNOLOGY GROUP

Develops machines, systems, software, automation solutions, and industrial technologies.

PROFESSIONAL	STRUCTURED	MINIMAL	TECHNOLOGICAL	GLOBALLY POSITIONED

What People Should Feel When They See Koleex

When someone sees the Koleex brand, they should feel:

- This is a global company
- This is a technology company
- This is an industrial company
- This is an engineering company
- This is a systems company
- This is a structured company
- This is a professional company
- This is a modern company
- This is a future-focused company
- This is a reliable company
- This is a serious company
- This is not a small company
- This is not a trading company only
- This is a group
- This is a technology and industrial group

Brand Positioning

Koleex International Group

The brand should always be positioned as an international group operating across multiple sectors including manufacturing, technology, systems, and international trade.

The brand must appear:

• Global
• Professional
• Industrial
• Technological
• Structured
• Engineering oriented
• System oriented
• Future focused

Brand Personality Summary

If Koleex were a person, it would be:

• Quiet
• Confident
• Intelligent
• Structured thinker
• Engineer mindset
• Designer mindset
• Business mindset
• Minimal style
• Modern
• Elegant but simple
• Professional
• Speaks less but confidently
• Focused on systems and results
• Not loud
• Not flashy
• Not colorful
• Not emotional
• Logical and structured
• Future oriented

Brand personality: Global – Professional – Future – Minimal – Industrial – Technology – Innovation

Design Philosophy Summary

Koleex design philosophy is based on:

• Minimal design
• Strong grid systems
• Large spacing
• Negative space
• Black & white color system
• Clean typography
• Structured layout
• Industrial and technology visuals
• Engineering precision
• Consistent icon system
• Professional UI design
• Smooth motion design
• Technology showroom interiors
• Minimal packaging
• Structured documents
• Consistent brand system across all touchpoints

Design should feel similar to: Apple · Sony · Tesla · Industrial technology companies · Engineering companies · Global technology companies

Visual Identity System

The Koleex brand identity system includes:

• Logo system
• Color system
• Typography system
• Layout & grid system
• Graphic elements
• Background style
• Icon system
• UI design system
• Website design system
• Social media system

- Poster & print system
- Packaging system
- Exhibition & interior system
- Motion & animation system
- Brand applications
- Brand touchpoints
- File structure system

> All these elements together form the Koleex Brand Identity System.

28 Final Brand Principles

All Koleex designs, products, systems, environments, and communications must follow:

01 **1. Minimal**	02 **2. Clean**	03 **3. Structured**	04 **4. Grid Based**
05 **5. Black & White First**	06 **6. Technology Style**	07 **7. Industrial Style**	08 **8. Engineering Precision**
09 **9. Large Spacing**	10 **10. Negative Space**	11 **11. Consistent Typography**	12 **12. Consistent Icons**
13 **13. Consistent UI**	14 **14. Smooth Motion**	15 **15. Professional Tone**	16 **16. Global Company Image**
17 **17. System Thinking**	18 **18. Not Colorful**	19 **19. Not Crowded**	20 **20. Not Random**
21 **21. Not Cartoon**	22 **22. Not Cheap**	23 **23. Not Old Style**	24 **24. Not Messy**
25 **25. Everything Aligned**	26 **26. Everything Consistent**	27 **27. Everything Structured**	28 **28. Everything One System**
